

Project: 500/700 South Reconstruction from 2800 to 5600 West

Recipient: Salt Lake City, Utah

Location: Salt Lake City, Utah

Purpose: Funding will be used to reconstruct a portion of this essential westside Salt Lake City street that is showing extreme deterioration. Construction elements will include pavement restoration, curb and gutter, drainage and utility improvements, upgrades to traffic flow characteristics, and railroad crossing improvements, which will require re-alignment of the roadway. The roadway will be widened from two lanes to four lanes with an additional center turn lane. Bicycle lanes will be included, and street lighting will be enhanced. Industrial growth in this area of the City has resulted in traffic impacts that exceed the structural design characteristics of the existing roadway. Improvements to 700 South will encourage private development, and improve traffic flow, accessibility, sustainability, and economic growth in this area of Salt Lake City.

Amount: \$5,000,000
